

**Release of Liability for Internal Eye Health Exam**

**Vista Eye Care**  
13695 Colorado Blvd.  
Thornton, CO 80602  
Phone: (303) 450-2020  
Fax: (303) 920-1440

A thorough examination of your retinal health is recommended each year and is part of your annual comprehensive eye health and vision examination.

While dilating the eyes and viewing the retinas is considered the standard of care, OPTOS imaging is the next best option to viewing the retina and checking the health of the eyes. This Release is to certify that you have been informed that a thorough internal examination of your eyes is integral to an eye examination and is recommended for your own eyes.

Without a thorough internal examination, serious eye disease can be missed including retinal disease, diabetes, glaucoma and other nerve disease, or malignant tumors. All of these can lead to loss of vision, blindness, or even death.

\_\_\_\_\_ I ***will return*** for an internal examination of the eye by OPTOS imaging or dilation.

\_\_\_\_\_ I ***decline*** to have an internal examination of the eye by OPTOS imaging and dilation.
